1. CONTROL UNITS

- 2 addressable models, supporting 50 or 250 points
- 2 conventional models, supporting four or eight zones
- Features LCD and LED displays
- Compact, yet powerful
- Easy to program, configure and update
- Connects to central station via IP LAN, IP cellular or standard telephone connection

2. SENSORS

- Full range of addressable and conventional devices, including photo, heat, CO, multisensor, duct and more
- Perfectly suited to the area being protected
- High-quality units reduce nuisance alarms

3. NOTIFICATION APPLIANCES

- Full line of notification appliances
- Easy to install and configure
- Clear signaling of emergencies

4. ANNUNCIATORS

- LCD and LED versions
- Easy to read local annunciation of alarms and events

5. INITIATING DEVICES AND MODULES

- Easy manual initiation and signaling of an emergency
- Modules allow easy interfacing with other equipment such as flow switches, elevators and building security

6. SIMPLE INSTALLATION

- No lengthy training necessary; online videos walk you through installation and training
- Addressable control units can be configured using an app and programming wirelessly uploaded from the phone to the control unit
- Sensors include QR codes that can be read with the programming app, making them easy to label and configure

A NEW FOUNDATION FOR FASTER, EASIER INSTALLATIONS.

The Simplex Foundation Series brings Simplex performance, reliability and innovation to projects that are smaller in scope. With easy installation, simple programming and outstanding performance, Foundation Series delivers big benefits to contractors and facility managers. A complete line of addressable and conventional control units, initiating devices, notification appliances and annunciators mean protection tailored to your facility.
